DETAILED ACTION

1. This Office Action is a Non-final Action responding to the After Final filed on 08/17/2005. Applicant acknowledged the invention in the present application and Benantar publication are commonly assigned, 35 USC 103(C), therefore, the rejection made in the **f**inal **6**ffice action is now withdrawn.

2. Claims 1-24 are pending.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kent, US Patent No. 6671804B1 (See PTO-892 filed on 12/12/04, in view of Sudia, US Publication No. 20050114666A1.

Application/Control Number: 09/862,797

Art Unit: 2135

5. As per claims 1, 8, 15, and 22-24, Kent discloses "A method for creating a proof of possession confirmation for inclusion by a certification authority into a digital certificate, the digital certificate for use by an end user, the method comprising: receiving, from the certification authority in response to a certificate request by the end user, a plurality of data fields corresponding to a target host system, the identity of the end user, and a proof of identity possession by the end user" in (Col 7 lines 1-35, Col 9 lines 35-60, Col 9 line 60 to Col 10 line 40 (private Key is the proof of identity possession)); "analyzing the content of said plurality of data fields; verifying the accuracy of said plurality of data fields; and if said plurality of data fields is verified as accurate, sending a signed object to the certification authority, said signed object comprising the proof of possession confirmation" in (Col 10 lines 25-40, Col 7 lines 1-35, Col 8 lines 23-45, Col 9 lines 15-28, and Col 12 lines 25-48). However, Kent is silent on the limitation "said proof of possession confirmation is constructed in a manner so as to prevent replay attacks by an imposter". Nevertheless, Sudia discloses "Blocked Tree Authorization and Status Systems" invention, which includes an authentication method for requesting an attribute certificate that comprises multiple fields, and a hash string, which is utilized to authenticate and proof of possessing the certificate (Para 0072, 0085, 0087, 0111-0128, 0238-239, 0256, and 0329-342). Therefore, it would have been obvious at the time of the invention was made for one having ordinary skill in the art to modify Kent's invention to incorporate hash string of information as a key to encrypt the requesting object fields with the motivation of strengthening the authentication security.

Art Unit: 2135

- 6. As per claims 2, 9, and 16, Kent discloses "the method of claims 1, 8, and 15, wherein said plurality of data fields further comprises: a host name; a subject identification; a subject public key information; and a sealed proof of possession" in (Col 7 lines 1-35, Col 9 lines 35-60, Col 9 line 60 to Col 10 line 40, and Col 12 lines 25-48 (private Key is the proof of identity possession) (extension field can be used to include the host name info)).
- 7. As per claims 3, 10, and 17, Kent discloses "the method of claims 2, 9, and 16, wherein analyzing the content of said plurality of data fields further comprises: decrypting a proof of possession structure from said sealed proof of possession; extracting a password from said sealed proof of possession structure; extracting a key identifier from said proof of possession structure; and calculating a correct key identifier from said subject public key information" in (Col 9 line 55 to Col 10 lines 45).
- 8. As per claims 4, 11, and 18, Claim 1 rejection basis is incorporated. Further, Kent discloses "the method of claims 3, 10, and 18, wherein the accuracy of said plurality of data fields is verified if: said host name is matched with an identity of said target host system; said extracted password is validated as a valid password for the end user; and said extracted key identifier is matched with said correct key identifier calculated from said subject public key information" in (Col 10 lines 25-67) and in Sudia

Art Unit: 2135

(Para 0072, 0085, 0087, 0111-0128, 0238-239, 0256, and 0329-342).

- 9. As per claims 5-6, 12-13, and 19-20, Kent discloses "the method of claims 3 and 10, wherein said extracted password and said extracted key identifier are initially symmetrically encrypted" in (Col 10 lines 25-40). It is well know in the art that the X.509 certificate utilizes symmetrical and asymmetrical encryption utilizing private-public key.
- 10. As per claims 7, 14, and 21, Claim 1 rejection basis is incorporated. Further, Kent discloses "the method of claims 1 and 8, wherein: said plurality of data fields includes a password; and said signed object does not include said password" in Sudia (Para 0072, 0085, 0087, 0111-0128, 0238-239, 0256, and 0329-342).

Response to Arguments

- 11. Applicant's arguments with respect to claims 1-24 filed on 08/17/05 have been considered but are moot in view of the new ground(s) of rejection. See the rejection above.
- 12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Linh LD Son whose telephone number is 571-272-3856. The examiner can normally be reached on 9-6 (M-F).
